Bash Scripting & Unix

SQL & MongoDB

C++

Data Structures and Algorithms

C# & .NET

Information Security

Desktop App GUIs

I have a rather unique background, having studied a diverse set of interests including computer science, criminal justice, and mechanical engineering. While in college to pursue my lifelong goal of a career in law enforcement, I discovered my passion for the field of computer science, particularly design and development, cyber security, and computer forensics. I plan to finish my B.S. in criminal justice with a minor in information security in 2021, and to continue learning and improving skills in the computer science field outside of school, as independent learning has always worked best for me. I am interested in any multitude of career options, especially those that include both law enforcement and technology.
